Database: **MySQL**

Experience

FEBRUARY 2026 - PRESENT

Hercam, Alfafar (Spain) - Fullstack Web Developer

- Developed a business intelligence dashboard using Laravel to analyze sales and operational data.
- Built an ETL pipeline to ingest Excel imports, normalize raw data, and populate a structured database.
- Designed a relational schema to support invoices, line items, customers, and cost tracking.
- Implemented dynamic data tracking and filtering to generate interactive charts.
- Calculated key business metrics (revenue, cost, margin, etc.) based on custom business logic.
- Built role-based action controls to differentiate between user and admin permissions.

Education

Web Application Development - Florida Universit ria, Catarroja (Spain)

Master's in Language Pedagogy- University of Utah, Salt Lake City (United States)

B.A. in Spanish - Weber State University, Ogden (United States)

Projects

BI Dashboard - Laravel-based analytics dashboard with an ETL pipeline for processing Excel data and generating interactive business metrics.

Gym App (team project) - Angular frontend with Symfony REST API for managing users, workouts, and scheduling.

Freelance Job Board - Full-stack Symfony application with job listings, user authentication, and CRUD functionality.
